

## Carbon Reduction Plan

Supplier name: Clarity Pharma Ltd				
Publication date:	12/10/2024			

### **Commitment to achieving Net Zero**

Clarity Pharma Ltd is committed to achieving Net Zero emissions by 2050 in line with the goals of the NHS net zero supplier roadmap.

### **Baseline Emissions Footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023/24

#### Additional Details relating to the Baseline Emissions calculations.

Clarity Pharma emissions for 2023/24 were established as the baseline since we have never reported on this area of the business in previous years. 2023/24 is the first time the carbon emissions have been analysed hence the 2023/24 data will be used as our baseline for carbon reporting.

The Greenhouse Gas Emissions report will follow the Small Business User Guide: Guidance on how to measure and report your greenhouse gas emissions (Ref:PB13310) which can be found on the <a href="https://www.gov.uk">www.gov.uk</a> website.

The 2022 Government Greenhouse Gas Conversion Factors for Company Reporting methodology paper for conversion factors published on the <a href="https://www.gov.uk">www.gov.uk</a> website has helped to give us an overview on the areas that we need to measure.

Baseline year emissions: 2023/24		
EMISSIONS	TOTAL (tCO₂e)	
Scope 1	0	
Scope 2	14.28	
Scope 3	1,476.8	
(Included Sources)	This is comprised of: Transportation and distribution – 1,232 Purchased Goods and Services – 1.5 Business Travel - 8 Waste generated in operations – 235.3	
Total Emissions	1491	

# **Current Emissions Reporting**

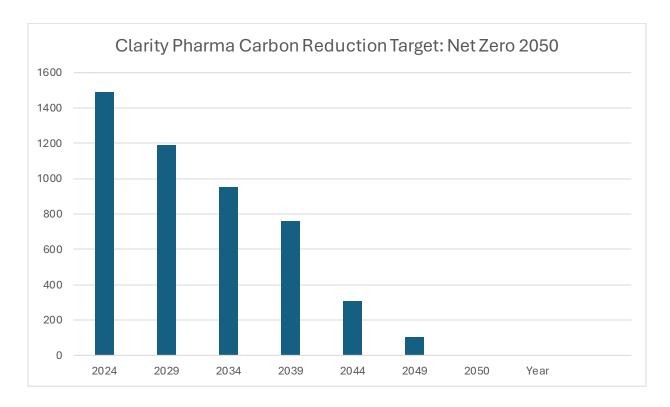

Reporting Year: 2023/24		
EMISSIONS	TOTAL (tCO₂e)	
Scope 1	0	
Scope 2	14.28	
Scope 3	1,476.8	
(Included Sources)	This is comprised of: Transportation and distribution — 1,232 Purchased Goods and Services — 1.5 Business Travel - 8 Waste generated in operations — 235.3	
Total Emissions	1491	

### **Emissions reduction targets**

Clarity Pharma Ltd has recognised the importance of limiting its carbon emissions and will continue its progress in the future. In order to continue our progress to achieving Net Zero, Clarity Pharma Ltd have adopted the following carbon reduction targets.

We would project that our carbon emissions will decrease over the next five years to 1193 tCO<sub>2</sub>e by 2028/29. This is a reduction of 20%.

To continue our progress in achieving Net Zero, we have adopted the following carbon reduction targets.

### **Carbon Reduction Projects**

### Completed Carbon Reduction Initiatives

Clarity Pharma introduced a system to recycle 100% of our cardboard waste which is collected in bales, when there is enough to collect, a company called Ecogen Recycling Ltd will load a full Articulated Lorry which holds approximately 10 bales which is collected on a regular basis. Motion sensors have been installed into several toilets and meeting rooms to reduce unnecessarily lit space and all employees have been encouraged to turn off lights when not needed.

To reach our target we plan to implement further measures such as:

		Carbon Reduction initiatives
	Scope	Initiative
Scope 1	Fugitive Emissions	Reduce the use of air conditioning units in the offices.
Scope 2	Electricity	Switch electricity supply to 100% renewables in Unit 1 and Unit 3 Warehouse/Offices.
	Category 1: Purchased Goods and Services	Improve manufacturer and supplier engagement to create sustainability initiatives and collaborate where possible on carbon reduction targets for reducing emissions across the supply chain.
Scope 3	Category 4&5: Transportation and Distribution	Closely monitor DPD's Sustainable Delivery Dashboard which displays all-electric deliveries with associated CO2 savings. DPD's initiative to reduce both direct and indirect greenhouse gas emissions by 43% by 2030 and 90% by 2040 is key to our long-term strategy of being Net Zero by 2050. Green Website (dpd.co.uk)
	Category 6: Waste Generated in Operations	<ul> <li>Use minimal and eco-friendly packaging materials to reduce waste.</li> <li>Create a waste-conscious culture by involving employees in waste reduction programs and encourage them to suggest process improvements.</li> <li>Provide training to employees on waste reduction techniques and improve recycling practices.</li> </ul>
	Category 7: Business Travel	Encourage virtual meetings vis Teams/Zoom to reduce the need for in-person travel where possible.  Promote within the company the use of public transportation, carpooling or cycling to work.  Encouraging employees to combine multiple meetings into a single trip to minimise the frequency of travel.

### **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors of Clarity Pharma Ltd.

Signed on behalf of the Supplier:

Edward Seviour
